

Integrated with eClinicalWorks

Envision patient success with Luma. Imagine your EHR workflows automatically driving improved reach, access to care, and health outcomes for all your patients and not-yet-patients. Luma integrates with eClinicalWorks to extend and enhance your capabilities.

Unlock the power of eClinicalWorks with Luma

Luma meshes with your unique workflows and integrates with your eCW EHR to enhance your organization’s goals. Integration with eCW enables you to:

- ✔ Offer 24/7 scheduling with flexible appointment types
- ✔ Automatically offer waitlist patients new appointments as soon as they are open
- ✔ Send two-way reminders to enable patients to confirm or cancel upcoming appointments scheduled in eCW
- ✔ Broadcast messages to large patient populations based on criteria from eCW (e.g. appointment with a specific provider)

What sets Luma apart

- » Efficient, unlimited messaging rather than per-message fees
- » Support of out-of-the-box and custom workflows
- » Experienced implementation at any point in your EHR install, upgrade, or maintenance

Outcomes from Luma + eCW Community

20 HRS

Appointment reminders helped reduce over 20 hours per week of additional staff time.

28,000+

Appointments booked through Luma in 12 months.

\$1.8 M

\$1.8 million in estimated additional revenue from automated/online scheduling

Connected to your eClinicalWorks schedule with integration

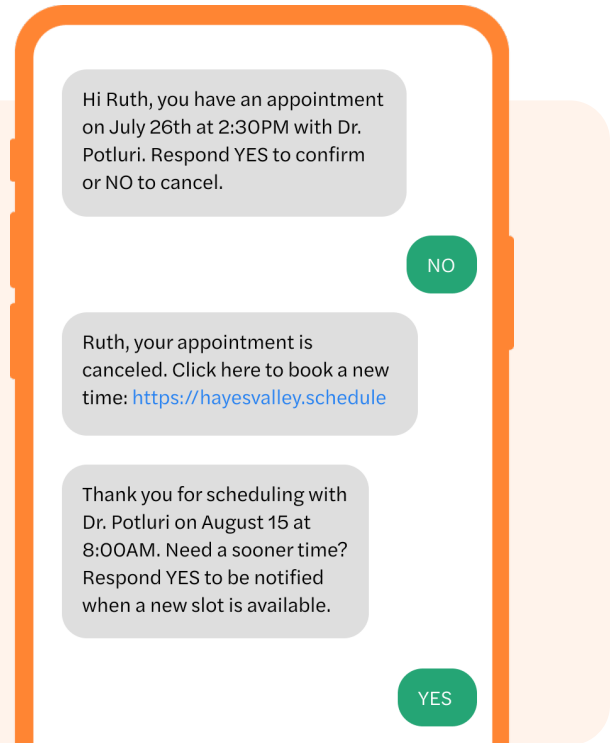

For staff, fuller schedules and fewer manual tasks. For patients, a delightful experience with fewer phone calls.

Ruth, 74 | Retiree

Out of town visiting grandchildren and can't make original appointment time.

- 1 **Text-based reminder**
- 2 **Easy cancellation**
- 3 **New appointment offer**
Additional option to offer specific available times
- 4 **Added to waitlist**

GPW Health Center gained \$30,000 in revenue in 7 months by matching patients with open appointments

GPW Health Center
Dedicated to Your Health

The platform's deep integration with eCW ensures that the automation from Luma Health is seamlessly saved and updated in the EHR"
